ABSTRACT

The Merged Federal File for 1978-79 contains school district level data from the following six source files: (1) the Census of Governments' Survey of Local Government Finances--School Systems (F-33) (with 16,343 records merged); (2) the National Center for Education Statistics Survey of School Systems (School District Universe) (with 16,743 records merged); (3) the Equalized Property Value File (with 15,631 records merged); (4) the 437 Office of Education State-Administered Program File (with 14,464 records merged); (5) the Equal Employment Opportunity Commission Elementary and Secondary Staff Survey (EEO-5) (with 7,962 records merged); and (6) the Office for Civil Rights (OCR) Elementary and Secondary School Survey (with 6,041 records merged). This document describes the merged file and lists its physical characteristics (i.e., record layout). Definitions of all codes and a description of cross-referencing and editing procedures are provided. The survey forms for the EEO-5, F-33, and OCR files and a reference list of the original source file documentation are included. A separate tape contains special tabulations and the 1970 Census Fifth Count data; this tape is in one-to-one correspondence with the merged file. (SLD)

DOCUMENT OVERVIEW

This document describes both the OS and SAS versions of the 1978-1979 Merged Federal File.

The document first outlines the editing procedures which were performed on each of the seven source files which contributed data to the Merged Federal File.

The document next contains a section describing the OS version of the file. Included in this section is a list of the OS file's physical characteristics, its record layout, and a description of each of the data elements which appear on the file. A similar section describes the SAS version of the Merged Federal File, including a list of the SAS file's physical characteristics and a SAS PROC CONTENTS.

Definitions of all codes which appear on the Merged Federal File are provided, as well as a description of cross-referencing and editing procedures performed by AUI on the code variables.

The document includes copies of survey forms associated with four of the source files. These forms are the Office for Civil Rights Form 101, the Equal Employment Opportunity Commission Elementary Secondary Staff Information Survey (EEO-5), the Bureau of Census' Survey of Local Government Finances.

Finally the document provides a reference list of original source file documentation, where such documentation is available. This document is intended to supplement the documents named in the reference list.

It should be noted that a separate tape has been created containing NIE Special Tabulations and 1970 Census Fifth Count Data. This tape is in one-to-one correspondence with the 1978-1979 Merged Federal File. The reader may wish to reference the documentation accompanying this Census data tape, as well as the documentation provided with the 1976-1977 Merged Federal File.

SOURCE FILE EDITING

The Merged Federal File contains school district level data from the following six source files: (1) the Census of Governments' Survey of Local Government Finances - School Systems (F-33); (2) the NCES Survey of School Systems (School District Universe); (3) the Equalized Property Value File (EPV); (4) the Office of Education State-Administered Program File (437); (5) the EEOC Elementary and Secondary Staff Survey (EEO-5); and (6) the OCR Elementary and Secondary School Survey (OCR).

Because the Merged Federal File data have been collected by seven separate agencies, and because much of the data had not been thoroughly edited before dissemination, AUI performed extensive editing on data from each source file before incorporating this data into the Merged Federal File. This section of the document describes that source file editing.

The merged file was created by first producing a master universe file containing a record for each valid school district which appeared on either the F-33 or the School District Universe source files. This master universe contains records for 16,874 school districts.

The remaining four source files were then merged one by one to the master universe, by OE state code and LEA code. Before merging, state and LEA codes on each source file were compared to those in the master universe, and differences were resolved where possible by comparing the name and address of the school district on the source file to names and addresses of school districts in the master universe. State and LEA codes from the master universe were assigned to the source file record where a name and address match was found. Where no match was found, the source file record was not merged to the master file. See Exhibit 1 for a summary of the number of records from each source file which were incorporated into the Merged Federal File. See Exhibit 2 for a summary of the states for which data were reported on each of the seven source files.

File-specific edit procedures, and general notes regarding source file data, are described by source file below.

F-33 File

Data were originally entered into the F-33A file for school systems in 34 states (and the District of Columbia) whose state education agencies indicated that they would report current expenditures in accordance with a Handbook II format. The F-33B file contained data for school systems in 17 states that reported current expenditures in accordance with Handbook II, Revised. The Ohio state education agency provided data for 57 of their school systems in the Handbook II, Revised format but used the Handbook II format for all other school systems in the state. Data for records in the B file were converted to the A file format and added to the A file using the specifications contained in Appendix A of this document. Only this final A file data were used in the Merged Federal File.

In editing F-33 data for inclusion in the master universe, local education agency (LEA) codes were changed for eight sets of duplicate LEAs in California (each set contained an elementary and a high school district). The new codes corresponded to the LEA codes assigned to these districts by NCES. A few records were deleted from the F-33 because they did not represent valid school districts (e.g., community college records). The F-33 and SDU files were matched by state and LEA code, and some LEA codes on the F-33 were changed as a result of this comparison to correspond to LEA codes on the School District Universe.

School District Universe File

A comparison was made of the grade span of each district on the SDU against that district's name to ensure that districts whose names contained words like "Elementary," "High," or "Secondary" had appropriate grade spans. No changes were made as a result of this comparison.

The OE state code for Northern Marianas was changed from 65 to 69 on the School District Universe. Eight California school districts which appeared as separate elementary and high school records on the F-33 file were split into two records on the School District Universe. The LEA codes for these districts were assigned by NCES.

Because fall enrollment data lag by one year on the School District Universe survey, the fall enrollment data item from the 1979-1980 School District Universe file was merged to the 1978-1979 master universe.

EPV File

Equalized property value (EPV) data were extracted from the 1976-1977 Merged Federal File, since more recent data were not available. These data are not consistent across the 50 states, due to variations at the state level. Comparable data on equalized property valuations are available for 36 states. In one state, Hawaii, there is no local tax on property, therefore, there are no data. For the 36 states for which EPV data are available, assessed valuation data are available for 28. It is important to note that while data are available for a state, all districts may not necessarily be represented. A summary of the contents of the original EPV file from Killalea Associates appears as Exhibit 3.

Some districts on the 1976-1977 Merged Federal File had consolidated by 1978-1979. EPV data for these districts were combined according to the following algorithm. If EPV data were identical for all component districts (e.g., because component districts have the same geographic boundaries), EPV data for the consolidated district were set equal to the EPV data from one of the components. If EPV data were present for all component districts, but the data values differed, assessed value and equalized property value data for the consolidated district were set equal to the sums of these data in the component districts. The tax rate data item for the consolidated district was set to a missing value. If data values were missing for any of the component districts, the corresponding data value for the consolidated district was set to a missing value.

437 State-Administered Program File

The original source file contains 82,712 records, a separate record per state-administered program per agency. Only those records with agency code = 1 (i.e., agency is an LEA) were selected for processing. This selection resulted in 68,559 records.

Of these LEA records, 399 contained LEA codes of 00000, and 1,174 contained duplicate State/LEA/Program codes. These problems were resolved where possible by comparing LEA names to the master universe and assigning new LEA codes to the records on the 437 file. Three hundred twenty-nine corrections were made.

Each remaining set of duplicate State/LEA/Program code records was combined to form one record, according to instructions from the Department of Education. Records with LEA codes of 00000 which were not resolved were deleted from the file.

As a final editing step, only those records with Add/Delete codes of blank or 'A' were selected for further processing.

Data for each state-administered program from these selected records were then combined to form one record for each State/LEA combination. Agency codes, line cycles, add/delete codes, and update codes were not retained. Some LEA codes on these combined records were changed because school districts had consolidated. In these cases, expenditure, participant, and grant data were added for the component districts to form one record for each consolidated district. Participant type codes for the consolidated districts were set to missing.

EEO-5 File

Only "total male and female" staffing data from the EEO-5 Survey were included in the Merged Federal File. Staffing data by race and sex categories were omitted. Two hundred seventy nine records on the file contained an authority code of "X," signifying that the school district had withheld authority for NCES to publish staffing information. Therefore these records contain no staffing data.

The EEO-5 Survey was conducted over a sample of school districts in the United States, and each record on the EEO-5 data file was assigned a sampling weight by EEOC. Because the Merged Federal File contains no EEO-5 staffing data for records which either had an authority code of "X" or which could not be matched with a district in the master universe, an adjusted sample weight was constructed for each EEO-5 record that was merged to the Merged Federal File.

The adjusted sample weight was calculated as follows. The sample weight was multiplied, for each sampling stratum, by the following factor -- sum of weights in the EEO-5 sample for that sampling stratum divided by sum of weights in the Merged Federal File sample for that sampling stratum. Note that because the weights are identical for each record in a given sampling stratum, this factor is equivalent to the number of districts in the EEO-5 sample for that sampling stratum divided by the number of districts on the Merged Federal File sample for that sampling stratum. Sample weights of 1 were not adjusted. (See Exhibit 4 for a discussion of sampling weight assignment on the source file.)

OCR File

The OCR Survey was also conducted over a sample of school districts, and the OCR file contains a sampling weight, similar to that on the EEO-5 file. The OCR file does not, however, contain a stratum identifier, nor can the sampling stratum be derived from data on the file. Because only 8 of the 6,049 OCR records (0.13%) were not able to be added to the Merged Federal File (because of LEA code mismatches), the sampling weights on the OCR file were not adjusted.

EXHIBIT 4

SAMPLING WEIGHT ASSIGNMENT ON EEO-5 FILE

Sample weights on the EEO-5 file were assigned as follows: 1,547 records which represented 'forced' or 'high interest' school districts had a sample weight of 1. The remaining sample weights were assigned by EEOC according to the following formula:

$$\text{Sample weight} = \text{Base weight for enrollment strata} \times \frac{\text{number of districts sampled in sampling strata}}{\text{number of responses in sampling strata}}$$

Base weights for enrollment strata were:

Enrollment Stratum 1 Base weight = 1
Enrollment Stratum 2 Base weight = 2
Enrollment Stratum 3 Base weight = 4
Enrollment Stratum 4 Base weight = 6.67

Sample weights in unforced districts were distributed over 12 sampling strata as shown below:

- Enrollment Stratum = 1
  - New Metro status code = 1 Weight = 1.0948
  - New Metro status code = 2 Weight = 1.0948
  - New Metro status code = 3 Weight = 1.0948
- Enrollment Stratum = 2
  - New Metro status code = 1 Weight = 2.0
  - New Metro status code = 2 Weight = 2.4574
  - New Metro status code = 3 Weight = 2.2822
- Enrollment Stratum = 3
  - New Metro status code = 1 (no records)
  - New Metro status code = 2 Weight = 5.4257
  - New Metro status code = 3 weight = 4.8564
- Enrollment Stratum = 4
  - New Metro status code = 1 (no records)
  - New Metro status code = 2 Weight = 7.928

Data Element Description

Notes on Numeric Data

1. F33 File: Assessed valuations and equalized valuations are amounts rounded to thousands of dollars. If assessment/sales price ratios were provided instead of equalized valuations, the value in the record is a number carried to four decimal places (e.g., 2500 equals 25 percent). The tax rate is expressed in mills carried to two decimal places.

2. OCR File: All numeric data are in integer format with the exception of the sample weight, which is stored in floating point format.

3. EEO-5 File: All numeric data fields are in integer format with the exception of the weight and adjusted weight. These weight fields are stored as a real number carried to four decimal places. Note that the decimal point actually appears on the tape.

4. EPV File: Tax rate data are stored as real numbers carried to two decimal places. The decimal point actually appears on the tape.

5. CCDVI File: Staffing data were reported in tenths. The decimal is implied on the tape. Pupil membership data are in integer form.

6. 437 File: All fiscal data fields contain whole dollar amounts.

7. For all Files: All numeric fields are right-justified and preceded by leading zeros.

OPERATING CODES

Code 1	Operating system. A self-contained local public school system having its own decisionmaking board of control, operating a school or schools providing general elementary/secondary education, including vocational/technical education.
Code 2	Nonoperating system. A self-contained local public school system having its own decisionmaking board of control that does not operate schools, but pays tuition to other operating systems for the education of children residing within its boundaries.
Code 3	Supervisory union. An administrative agency that provides services to component school systems (found only in Maine, Massachusetts, New Hampshire, Vermont, and Nebraska).
Code 4	An operating system that is a component of a supervisory union.
Code 5	A nonoperating system that is a component of a supervisory union.
Code 6	A public agency providing general elementary or secondary education not included in the above categories, such as an area vocational/technical school system, special education school system, etc., which are not considered to be local school systems as defined in Code 1.

METRO CODES

1 = District located within the central city of an SMSA (or within the central core of an SMSA in five New England states);

2 = District located within the suburban area of an SMSA; and

3 = District located outside of an SMSA.

POPULATION METRO CODES

An additional metro code was calculated based on the population of a district, instead of a district's SMSA status, and was designated as population metro code. This code appears on the Census data tape, but has been included in the Merged Federal File for ease of use. Population metro codes are based on population counts extracted from the NIE Special Tabulations of Census Data by School District. This extract yielded three counts for each district: rural population, central city population, and other population. Depending on the location of a district, one or more of these variables could be zero. Population metro codes were assigned according to the following rules:

- If the rural population is greater than the sum of the central city and other populations, the population metro code equals 3;
- If the rural population is less than the sum of the central city and other populations, and other population is greater than central city population, the population code equals 2; and
- If a district does not fall into either of the above two categories (e.g., central city population is greater than the sum of rural and other populations), the population metro code equals 1.

Since population data were not available for districts with less than 300 enrollment, this calculation could not be accomplished for such districts. Therefore, the metro code should be used when there is no value for the population metro code.

ADDITIONAL CODES

Inclusion Flag Codes

Inclusion flags designate which of the seven source files contributed data for an individual school district. These flags appear in columns 95-101 of the OS file, and have variable names prefixed by INCL__ on the SAS file. The inclusion flags contain one of the following codes:

1 = Data are present from the source file for this school district; and

0 = Data are not present from the source file for this school district.

The following seven source files are represented by the inclusion flags:

- F-33 Survey (column 95)(INCL_F33);
- School District Universe (column 96) (INCL_SDU);
- OCR Survey (column 97)(INCL_OCR);
- 437 State Administered Programs (column 99) (INCL_SAP);
- EEO-5 Survey (column 100)(INCL_EEO); and
- Equalized Property Value (column 101) (INCL_EPV).

Missing Data Codes

The standard SAS symbols for missing data, '.' for numeric data and blank for character data, are used to denote missing data on the SAS tape. Missing data on the OS tape are denoted by -9 in all cases except single-digit fields and identification codes (e.g., LEA code, COG code, FIPS code, etc.). Single-digit fields and identification codes are blank on the OS tape if data are missing for those items. All files were checked to ensure there were no data items which could have had a valid value of -9.

Error Flag Codes

Geographic data in the School District Identification segment include codes for LEA, OE state, FIPS state, FIPS county, COG state, COG county, COG governmental unit, COG type, SMSA, metro, and operating status as well as city name, county name, state abbreviation, and zip code. These data were assigned values from the SDU file except for the COG codes, which were extracted from the F-33 file. Any errors in the F-33 or SDU geographic data were corrected, and the F-33 and SDU error flags indicate where corrections were made.

Those geographic data which appear on the other five source files were compared to the geographic data in the School District Identification segment on the Merged Federal File. Although most geographic data from these source files were not retained on the Merged Federal File, error flag variables allow the analyst to identify those data items which did not agree on the source file and the School District Identification segment.

The error flags were assigned the following codes:

0 = Geographic data item on source file was identical to that on Merged Federal File;

1 = Geographic data item on source file was present, but different than that on Merged Federal File; and

2 = Geographic data item on source file was missing.

In addition, if a district on any of the seven source files either consolidated or split, error flags for the LEA variable were assigned the following codes:

3 = Districts on source file have been consolidated; and

4 = District on source file has been split.

The error flags appear at the beginning of each source file segment on the OS Merged Federal File, and are prefixed by F33__, SDU__, OCR__, SAP__, EEO__, or EPV__ on the SAS file.

CODE EDITING

County Code Editing

Because the Bureau of the Census had updated county codes in four school districts, the following changes were made to the master file before SMSA codes were checked and corrected:

- In Virginia, the county for Manassas City school district was changed from 153 (Prince William County) to 683 (Manassas City);
- In Virginia, the county for Manassas Park City school district was changed from 153 (Prince William County) to 685 (Manassas Park City);
- In Virginia, the county for Poquoson City school district was changed from 199 (York County) to 735 (Poquoson City); and
- In Georgia, Muscogee County school district was changed to Columbus school district and the county for Columbus was changed from 215 (Muscogee County) to 510 (Columbus City).

SMSA Code Editing

The School District Universe file contains Bureau of the Census Standard Metropolitan Statistical Area (SMSA) codes. The following procedures were used to verify the accuracy of the SMSA codes assigned to individual districts and to edit or update the SMSA codes.

Outside of New England, SMSAs are coterminous with one or more counties. The editing procedure in these states compared the SMSA and county code on the SDU to a cross-reference file of county and SMSA codes. This file was prepared from the OMB publication (Standard Metropolitan Statistical Areas, Revised Edition, Executive Office of the President, Office of Management and Budget, 1975) and from OMB press releases since the publication was issued. Two hundred twelve SMSA codes were updated as a result of this comparison.

In five New England states -- Connecticut, Maine, Massachusetts, New Hampshire, and Rhode Island -- SMSA codes are assigned to cities and towns instead of to counties (Vermont has no SMSAs). For school districts in these five states, SMSA codes were compared to those which were assigned to those school districts during the creation of the 1976-77 Merged Federal File. Because thorough editing of the New England SMSA codes was performed at that time, any discrepancies were corrected in favor of the 1976-77 Merged Federal File values. One hundred thirteen SMSA codes were updated as a result of this comparison.

Metro Code Editing

School districts on the School District Universe and F-33 files have been assigned metro codes according to the following definitions:

1 = District located within the central city of an SMSA (or within the central core of an SMSA in five New England states);

2 = District located within the suburban area of an SMSA; and

3 = District located outside an SMSA.

The following procedure was used for checking the accuracy of metro codes on the 1978-79 Merged Federal File.

A cross-reference file was created which associates SMSA codes with names of cities which are either the central city of the SMSA or in the central core of the SMSA for New England. This cross-reference file was created from data in the OMB SMSA publication (Standard Metropolitan Statistical Areas, Revised Edition, 1975) and in OMB press releases since the publication was issued.

Metro codes in the School District Identification segment of each record on the Merged Federal File were initially set to the metro code value from the School District Universe. These codes were then checked against the cross-reference file and updated as follows:

- If the district was not within an SMSA, the metro code was set to 3.
- If the district was within an SMSA and the city in which the school district was

located was a central city or central-core city for that SMSA, the metro code was set to 1.

- In all other cases, the metro code was set to 2.

This editing procedure resulted in the following changes: In New England, metro codes in 115 school districts were changed from 2 to 1, metro codes in nine school districts were changed from 2 to 3, metro codes in 37 school districts were changed from 3 to 1, and metro codes in 67 school districts were changed from 3 to 2.

In non-New England states, metro codes in 13 districts were changed from 1 to 2, metro codes in 551 districts were changed from 2 to 1, metro codes in two districts were changed from 2 to 3, metro codes in 36 districts were changed from 3 to 1, metro codes in 137 districts were changed from 3 to 2, and the metro code in one district was changed from a missing value to 3.

SDU_MET error flags were set to 0 if the metro code on the Merged Federal File was equal to the metro code on the SDU, to 1 if the SDU metro code was incorrect, and to 2 if the SDU metro code was missing.

The corrected metro code on the Merged Federal File was also compared to the metro code on the F-33 file, and the error flag F33_MET was set appropriately.

Operating Code Editing

Operating codes from the School District Universe were checked to ensure that they conformed to the following four rules:

- All LEAs have a valid operating code (1-6);
- LEAs with an operating code of 1 have a nonzero enrollment;
- LEAs with an operating code of 2 or 5 have zero enrollment; and
- LEAs with an operating code of 3, 4, or 5 are only found in Maine, Massachusetts, New Hampshire, Vermont, and Nebraska.

It was determined that all districts which had been assigned an operating code on the School District Universe conformed with the first and fourth rules.

One hundred thirty three districts had an operating code of 1, but had zero enrollment on either the 1978-1979 or the 1979-1980 School District Universe. After consulting with NCES, the following changes were made: operating codes were corrected for five of these districts, and 1978-1979 and 1979-1980 enrollment data were corrected for 40 districts. After these corrections were completed, a further editing operation was performed. If the enrollment from the 1979-1980 School District Universe was zero for districts with an operating code of 1, that enrollment was set to missing. If the enrollment data from the 1978-1979 School District Universe was missing or zero, it was set to the enrollment value from the 1979-1980 School District Universe.

One hundred thirty eight districts had an operating code of 2 or 5, but had nonzero enrollment on either the 1978-1979 or the 1979-1980 School District Universe. After consulting with NCES, the following changes were made: the operating code for one district was corrected, and 1978-1979 and 1979-1980 enrollment data were set to zero for 16 districts.

A list of LEAs with an operating code of 6 was scanned by NCES to ensure that these codes were valid. No changes were made.

SURVEY FORMS

APPENDIX

REPORTING REQUIREMENT:

This report is required by HEW pursuant to Title VI of the Civil Rights Act of 1964, Title IX of the Education Amendments of 1972, and under Section 504 of the Rehabilitation Act of 1973. Section 80.6(b) of HEW Regulation (45 CFR 80) issued to carry out the purposes of Title VI of the Civil Rights Act of 1964 provides:

Compliance Reports. Each recipient shall keep such records and submit to the responsible Department official or his designee timely, complete and accurate compliance reports at such times, and in such form and containing such information as the responsible Department official or his designee may determine to be necessary to enable him to ascertain whether the recipient has complied or is complying with this Regulation.

GENERAL INSTRUCTIONS AND DEFINITIONS

FALL 1978
ELEMENTARY AND SECONDARY SCHOOL CIVIL RIGHTS SURVEY
SCHOOL SYSTEM SUMMARY REPORT: FORM OS/CR 101

Office for Civil Rights
Washington, D.C.

Due October 15, 1978

GENERAL INSTRUCTIONS:

- Please use a typewriter or print legibly in ink.
- If the answer for a given item is "none", enter "0" in the appropriate space or in the total column only in the case of a matrix. If a particular item is not applicable in your case, enter "N/A" (not applicable) in the appropriate space or in the total column only in the case of a matrix.
- Please complete items 1 and 2 even if the label is correct.
- Please read the definitions below before you begin as there have been changes since the conduct of the 1976-77 survey.

DEFINITIONS:

- **SCHOOL:** For the purposes of this report, a school is a division of the school system consisting of students comprising one or more grade groups or other identifiable groups, organized as one unit with one or more teachers to give instruction of a defined type, and housed in a school plant of one or more buildings. More than one school may be housed in one school plant, as is the case when the elementary and secondary schools are housed in the same school plant.
- **RACIAL/ETHNIC CATEGORIES:** Racial/ethnic designations, as used by the U.S. Department of Health, Education and Welfare, Office for Civil Rights, do NOT denote scientific definitions of anthropological origins. For the purposes of this report, a pupil may be included in the group to which he or she appears to belong, identifies with, or is regarded in the community as belonging to. However, no person should be counted in more than one racial/ethnic category. The manner of collecting the racial/ethnic information is left to the discretion of the institution provided that the system which is established results in reasonably accurate data.
  - **AMERICAN INDIAN OR ALASKAN NATIVE:** A person having origins in any of the original peoples of North America and who maintains cultural identification through tribal affiliation or community recognition.
  - **ASIAN OR PACIFIC ISLANDER:** A person having origins in any of the original peoples of the Far East, Southeast Asia, the Pacific Islands or the Indian subcontinent. This area includes, for example, China, India, Japan, Korea, the Philippine Islands, and Samoa.
  - **HISPANIC:** A person of Mexican, Puerto Rican, Cuban, Central or South American, or other Spanish culture or origin - regardless of race.
  - **BLACK, NOT OF HISPANIC ORIGIN:** A person having origins in any of the Black racial groups of Africa.
  - **WHITE, NOT OF HISPANIC ORIGIN:** A person having origins in any of the original peoples of Europe, North Africa, or the Middle East.
- **SPECIAL EDUCATION PROGRAMS** are those designed to meet the needs of children with any mental, physical, or emotional exceptionality, including only educable mentally retarded, trainable mentally retarded, seriously emotionally disturbed, speech impaired, specific learning disability, deaf, hard of hearing, visually handicapped, deaf-blind, orthopedically impaired, other health impaired, and multihandicapped. Definitions for the exceptionalities are provided on the OS/CR 102 form. For the purposes of this report, programs for the socially maladjusted, and the gifted or talented should not be included as special education programs.

Your cooperation is appreciated.

4. TYPE OF CHANGE

a. In the boxes below, indicate the changes this school system has been involved in since September, 1976. Check all that apply.
- ☐ Consolidation (Two or more systems combine to form one larger system)
- ☐ Unification (Elementary and Secondary School Systems (excluding junior college or adult education programs) merge to form a unified system)
- ☐ Division (A larger system divides to form two or more smaller systems)
- ☐ Annexation (Transfer of schools between systems)
- ☐ This school system has not been involved in any of the changes listed above.

b. List the previous name(s) of the school system(s) involved in any of the changes indicated in item a. above. Be sure to include data for the school system as it is currently constituted.

____

____

5. COURT ORDER STATUS

Is this school system currently subject to a Federal or State Court Order requiring it to develop or implement a plan for pupil desegregation? ☐ Yes ☐ No

6. GRADUATION REQUIREMENTS

Is the course of study leading to graduation in any way different for females than for males? (Differences would include, but not be limited to, the number of credits required and/or the courses required or offered as options. "Yes" should be checked, for example, if female pupils are assigned to a home economics course unless they request a substitute course; if pupils of one sex, but not the other, may obtain academic credit for participation in any extracurricular activity; if male pupils are enrolled in Junior ROTC unless they present a request for exemption while enrollment by female pupils is completely optional.) ☐ Yes ☐ No

7. SPECIAL EDUCATION PROGRAMS

- For the purposes of this question, do not include pupils who are socially maladjusted, or are gifted or talented.

a. Number of resident, school-age children who have been identified, through evaluation, as currently requiring full or part-time special education whether or not they are enrolled in school. (Report only those pupils known to the school system at the time of reporting. It is not necessary to conduct a community survey to gather these data. All pupils who currently require special education should be counted, including those who may be sent outside of this school system for special education programs.) ☐ Children

b. Number of resident pupils, known to the school system, participating in a special education program operated by this school system, another school system, or any other entity such as a private school or state institution. ☐ Pupils

c. Number of resident pupils, known to the school system, who for the sole purpose of receiving full or part-time special education, participate full-time in educational programs not operated by this school system. ☐ Pupils

d. Of the pupils reported in 7c., the number of pupils for whom full payment of the costs (tuition, non-medical care, or room and board) is not provided by the school system, by the State education agency, or from other public funds. ☐ Pupils

e. Number of resident, school-age children, not included in 7a., who have been identified as needing evaluation but have not yet been evaluated to determine if they require special education. ☐ Children

8. PUPIL STATISTICS

- Please read definitions of racial/ethnic categories before you begin.
- Provide both lines of information by racial/ethnic categories (cols. 1-6) and sex (cols. 7-8).
- If the answer for a given item is "none" for all categories enter "0" in the total column only. Otherwise, complete the item for all categories, leaving no columns blank.
- Do not use percentages, average daily attendance, average daily membership, or year-end enrollment.

INSTRUCTIONS AND SUGGESTIONS

Before filling out this form, please read carefully each section and all related definitions and instructions.

Note especially:

1. Please report finance data for the fiscal year that ended between July 1, 1977 and June 30, 1978 and indicate the ending date in the space provided in the upper left-hand corner.

2. This form is intended to cover the financial transactions included in the district's accounts for the operation of elementary and secondary schools in the district. Do not report any transactions for junior college purposes, if the district operates any junior colleges.

3. Report gross amounts, except interfund transfers, including the transactions of all funds of the district, i.e., building funds, debt service funds, cafeteria and school lunch funds, and all other special funds as well as the general fund.

4. Please complete all sections. If some items do not apply to the district, do not merely leave the item blank, but enter "None" or a dash (–) in the space provided for the item.

5. Do not delay reporting to await finally audited figures, if substantially accurate figures can be supplied on a preliminary basis.
